We had been looking for a home in SW Florida since September. We looked in several areas and at older and new homes. We came close on a couple of houses but some kind of issue seemed to come up. In March we found a new home built by HomeQwest. We pretty quickly realized that this was the home for us. It had a great floor plan and was the perfect size for what we need. After thoroughly checking out the home we found so many upgrades throughout. From the cabinets, counter tops, appliances, building materials, lighting fixtures and fans and all of the smart features, everything was included in the base price with no up charges! It even had great landscaping where so many new homes give you the minimum. All this and the house was in a great neighborhood and with a very competitive price! We purchased the home and our only regret is that we didn't find HomeQwest earlier. Joe and Angelo have been very responsive to any questions or concerns that we have. They build a great home and think of every detail so you don't have to worry about it. It has been such a great experience sometimes we can't believe we're living here! We definitely recommend HomeQwest and you would be very smart to check them out if you are looking for a new home!
